

Demobilization

Following deployment, the horizontal fiber optic cables were left in place with a junction box, as shown in the following photographs (Figure 1).

Figure 1. Junction box for horizontal fiber optic cable at Brady Hot Springs, Nevada. Photos taken March, 2016. The temporary container building with windows has since been removed.

The vertical fiber optic cable was left in place with a junction box near Brady Well 56-1, as shown in the following photographs (Figure 2).
